SCHOOL OVERVIEW

At Badya University's School of Medicine, we aspire to redefine the standard of medical education in Egypt. Our philosophy revolves around unwavering professionalism and a steadfast commitment to excellence. Here's our vision:

Clinical Experience from Day One

Imagine stepping into a university-run teaching hospital right from the start. At Badya, our students gain hands-on clinical experience early on, bridging theory and practice seamlessly.

A Beacon of Excellence

Our unparalleled training and rigorous international focus create a transformative journey for aspiring doctors, preparing them to lead the way in the ever-changing medical field.

A Campus for the Future

Our state-of-the-art campus is more than just bricks and mortar. our campus fosters holistic student growth with engaging academics, extracurriculars, and relaxation spaces.

Student Support

We believe that academic success goes hand in hand with emotional well-being. We offer our students full support, whether it's mentorship, counselling, or advisory.

A Library Beyond Borders

Our library isn't just books - it's a gateway to endless knowledge with cutting-edge resources rivaling top medical schools.

Research-Ready Physicians

we nurture research-efficient physicians, not just doctors. We align research with international standards. Graduates lead the way in groundbreaking discoveries and best practices.

Degrees

The school grants students a bachelor's of science in medicine and surgery

Duration of Study

Five years

Credit Hours

314 credit hours + 2 years of training

PROGRAM OVERVIEW

The background of the slide features a collage of medical-related images. At the top, a hand holds a pen over a document with the words 'OPTION 01' and 'OPTION 02' visible. To the right, there is a black and white X-ray image of a human torso. Below the X-ray, a stethoscope with a blue tube and silver chest piece is coiled on a white surface. In the bottom left corner, a portion of a document with the text 'TH CARE' is visible. A small, yellow, porous object, possibly a sponge, is partially visible at the bottom center.

The program of Medicine and Surgery offers a transformative educational experience that prepares future doctors for the dynamic world of healthcare. Our curriculum is designed to foster seamless integration and coordination, ensuring a holistic approach to medical education.

This five-year program offers a seamless integration of medical knowledge, combining theoretical learning with early patient experience. This approach ensures graduates gain the necessary foundational knowledge and specialized skills to meet national and international accreditation standards.

Going beyond textbooks, our world-class faculty collaborates with renowned institutions, ensuring you learn from the best. We focus on experiential learning, using real-life case studies and problems to develop your critical thinking skills.

Sparking Innovation through UTMB Collaboration

BAYLOR
UNIVERSITY

Exclusive Joint Teaching

Elevate your learning with exclusive courses where UTMB experts cover key topics, bringing world-class insights and specialized knowledge to complement your education.

Advanced Faculty Training

Benefit from faculty development programs designed with UTMB to offer superior healthcare education and elevate teaching methodologies.

Research Opportunities

Engage in innovative joint research projects with UTMB, exploring areas critical to the Middle East and North Africa region, including the establishment of a research center of excellence.

Healthcare Excellence

Experience top-tier healthcare services through UTMB's expertise in quality improvement, healthcare digitalization, and clinical governance, positioning Badya as a regional medical hub.

Student Exchange Programs

Potential participation in student and faculty exchange programs with UTMB, gaining international exposure and advanced learning opportunities in the medical field.

Why Choose the School of Medicine at Badya University?

The School of Medicine at Badya University offers a transformative program designed to prepare the next generation of compassionate and skilled physicians. Exceptional education, renowned faculty, and state-of-the-art facilities equip students with the knowledge and skills necessary to make a positive impact on patients and communities.

Exceptional Medical Education

Our curriculum combines theoretical knowledge with practical experience, ensuring graduates are well-equipped and confident.

Expert Faculty

Renowned doctors, researchers, and educators provide guidance and mentorship, fostering a stimulating learning environment.

State-of-the-Art Facilities

Modern facilities with advanced technology allow students to gain practical experience in a realistic setting.

Extensive Clinical Rotations

At Badya Students gain valuable hands-on experience through rotations in various medical specialties within the university hospital.

Research Opportunities

Our program encourages research participation, fostering critical thinking and contributing to medical advancements.

Supportive Learning Environment

Badya University is committed to providing a supportive and inclusive learning environment. Personalized support services, academic advising, and a diverse and inclusive community ensure a successful learning journey.

Strong Academic and industry Partner

Our partnership with Cleopatra Group of Hospitals would be a win-win for both institutions, with students reaping the biggest benefits. Imagine Badya University students gaining practical experience by shadowing doctors at Cleopatra Hospitals, assisting with research projects, or even participating in mock clinics. This hands-on exposure would bridge the gap between theory learned in classrooms and the realities of the medical field. Students would develop essential skills in communication, teamwork, and problem-solving while directly applying their knowledge in a real-world healthcare setting. This collaborative effort would give Badya University graduates a significant edge in the job market, preparing them to be confident and competent medical professionals from day one.
